

OTHER PROFILE APPS (03-01-2011)

Elev Difference

This 3PC creates an ASCII file which shows the difference in elevations of 2 profiles at a user specified increment. This looks strictly at COGO so you can be in any Design file.

Station	ppnew	xp59	Difference
409+00.00	345.95	345.65	0.29
409+25.00	345.99	345.53	0.45
409+50.00	346.03	345.42	0.61
409+75.00	346.07	345.31	0.75

Place Profile Text

Place Profile Text in Plan View – Reads Profile from COGO and places user specified increment elevation text in plan view. (VBA)
